SUBJECT: Transmittal of the Explanation of Significant Differences for the Record of Decision for the Test Area North, Operable Unit 1-10, V-Tanks Site (DRAFT) (EM-ER-02-210)

Dear Mr. Pierre and Mr. Nygard:

The Explanation of Significant Differences (ESD) for the Record of Decision for the Test Area North, Operable Unit (OU) 1-10, V-Tanks Site addresses: 1) the necessity of on-site treatment, stabilization, short-term storage, and disposal of V-Tank liquid waste; 2) additional regulatory requirements that are either applicable or relevant and appropriate and support the tanks liquid waste treatment and short-term storage; and, 3) the investigation of the OU 1-10 area of contamination for the V-Tanks site.

This ESD supports the early remedial action activities that are currently in design and that are planned for 2003. The early remedial action activities include removal, treatment, and disposal of liquid from one or more of the three 10,000-gallon tanks. Treatment of the liquid will be accomplished using an on-site treatment system or using the INTEC process equipment waste evaporator. The early remedial action also includes further characterization of the contaminated soil around and to the north of the V-Tanks. The remaining remedial action for the V-Tanks is planned for 2005 and 2006 after a Proposed Plan and ROD Amendment are issued.

Pierre, Nygard
